-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3738

The disclosure is objected to because of the following informalities: On page 16, line 22, --incision-- should be inserted after "an"; on line 23, --or-- should be inserted after "incision", first occurrence. On page 20, lines 10 and 25, "C" has been replaced by --B--.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 and 17 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 15, lines 2-3, "said intracorneal cavity" lacks a proper antecedent basis. A similar problem exists in claim 17.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4, 6, 7, 9, 11, 12, and 15 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lee, US 6,231,583 B1, the related provisional application no. 60/052,028 of which discloses cutting a small incision into the cornea (page 5, line 11; page 9, lines 31-33;

Art Unit: 3738

Figure 6), creating a circular intracorneal channel (page 9, line 35, through page 10, line 2; Figure 4), widening said channel without ablation (page 10, lines 6-8 and 33-35; Figures 5 and 6), and introducing an intracorneal implant into said channel (page 10, lines 5-6; etc.). Regarding claim 6 and others, the side leg is viewed as the leading tip 6 or as the wing 12 or 13 (Figures 8(b) and 8(c)). Regarding claim 7: page 12, line 11 et seq.

Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee, US 6,231,583 B1. The further limitations of claim 5 would have been an obvious variant in view of the discussion on page 5, lines 12-16, or perhaps an obvious step backward in view of the aforementioned passage at page 12, line 11 et seq. A folded implant would have been obvious to the ordinary practitioner in order to facilitate loading into an insertion instrument.

Claims 2, 13, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
